

Sakra & Lanshan Terminal ISO and OHSAS Certification

Vopak Singapore's Sakra Terminal has just joined the ranks of over 500 enterprises/companies in Singapore to be certified to ISO 14001:1996 standard. In achieving the certification, this industrial terminal serving the numerous petrochemical plants in Jurong Island has become the first Vopak terminal in Singapore to embrace both the ISO14001 & OHSAS 18001 standards.

Vopak Shandong Lanshan has also joined other Vopak terminals in the region in achieving both certifications.

All efforts put in by employees of both terminals are highly commendable. Besides reaching new milestones in SHE standards, it also reinforces Vopak's strong commitment in providing a safe, healthy and sustainable business environment for its customers and workforce.
