

Double Celebration for Kertih Terminals in Q1 2005

One million manhours without LTI

February 2, 2005, was a major milestone for KTSB. As we have been able to work 1 million man-hours consecutively without any LTI incident since starting our operations on January 1, 2000.

“We are continuously modifying and improving our safety management system. Our Behavioural Based Safety Management System (Safety Observation and Incident Reporting System), training and safety awareness campaigns ensure we perform our work safely“, said Surizan Khalil, KTSB Operations Manager.

This year, contractors will be KTSB’s focus area. By implementing a safety culture through the Contractors Safety Management System and concerted efforts with contractors’ management KTSB expects to see contractors’ safety behavior improve considerably.

ISO 14001 & OHSAS 18001 certification

On March 3, 2005 KTSB was certified to the internationally recognized ISO 14001, Environmental Management System and OHSAS 18001, Occupational Health and Safety Management System by DNV. The accreditation was a result of a one year project, which involved all employees contributing and displaying excellent commitment in achieving the certification of both systems.

KTSB is the first company in the Kertih Petrochemical Complex in Malaysia to be certified ISO 9001, ISO 14001 and OHSAS 18001.
