

## **NEWS RELEASE**

### **Corporate Social Responsibility by Engro Vopak Terminal Ltd**

Singapore, 24 February 2009

The 190 students of Behbud Primary School, Karachi, come from families that subsist on or below the poverty line. The children, though rarely hungry, are often under-nourished. It became essential to try to improve their nutrition and milk seemed the obvious choice.

Engro Vopak Terminal Ltd (EVTL) stepped in to help as part of their Corporate Social Responsibility program. The management sanctioned money for supply of nutritious milk to the school children.

EVTL hopes to carry on this practice for many years to come – helping to nourish both the minds and the physical well-being of the school children.
